Betreff: Provisional draft mandate on fluorescent lamps, high-intensity discharge lamps, and ballast and luminaires able to operate such lamps

Dear Catherine,

Please find hereafter the comments of the German National Committee concerning the above-mentioned mandate

The German National Committee is in favour with the Draft Mandate and is of the opinion that this Standardisation project should be worked out under the scope of CLC/TC 34Z "Luminaires and associated equipment" in close cooperation with CEN/TC 169 "Light and Lighting". Apart from the energy requirements further aspects have to be included like the effect of lighting on human beings (circadian rhythm).

With the best wishes for the new year.

Yours sincerely,

German National Committee
of CENELEC
